PREFACE

This international meeting celebrates 2022 its 22nd anniversary. As in the past, the meeting is organized by the Association for the Promotion of Research in Arteriosclerosis, Thrombosis and Vascular Biology (ATVB), Vienna, Austria. It is patronized by the European Platelet Academy (EPA), and the Acute Cardiovascular Care Association (ACCA), a registered branch of the European Society of Cardiology (ESC).

In 2022, more than 30 international and national experts will guarantee an interesting conference with important topics illustrating the most contemporary and topical clinical research data mainly in the field of acute coronary syndromes, acute cardiac care, atrial fibrillation, interventional cardiology, heart failure and prevention. Master lectures and interactive clinical case discussions will extend our knowledge and enhance the practical relevance of the program.

The number of attendees is limited to a maximum of 100 persons in order to stimulate intense discussions with international and national experts on case presentations and main topics – a rare situation in the current era of large meetings.

The presenters of the best abstracts (a maximum of 18 abstracts will be accepted) will discuss their data with faculty members in moderated poster presentations. Two awards will be given for “best-of-translational medicine” and “best-of-clinical medicine” posters. The participants will be confined to the group of young “cardiologists of tomorrow”. In addition, presenters of posters will have free access to the whole meeting.

We would welcome your participation at this meeting.

With best regards
